

GIVE TODAY TO HELP 2,500 WOMEN IN INDIA WITH COVID-19 RELIEF

This giving season, would you support Women in India displaced by Covid-19 with a simple gift?

Women in Cloud has launched the #empowHERfamily initiative to provide economic relief to 1M women in India affected by the livelihood crisis caused by the pandemic. Through collective action, #empowHERfamily will provide hope to the women who need it most during these challenging times.

During the Microsoft GIVE season, Women in Cloud is partnering with Indiaspora, Give India, Microsoft Employees and its partners to help to raise \$1M to distribute as direct cash assistance to 2,500 women who lost the primary bread-winner in their families due to Covid-19.

You can make a difference by joining us in one of three ways:

- **Donate** - Can we count on you to contribute \$100, \$250 or \$500 towards achieving our collective goal? It only takes a few minutes to change 2,500 lives.
- **Sign up to become a volunteer** to serve in a variety of roles — from business mentors to local community advocates. Get recognized as an Influential Cloud Advisor and transform their careers through the power of collective access and action.
- **Invite and inspire** your professional and personal communities to join you in this cause, by sharing with your professional and personal networks.
